## Gusts

# Hazardous Weather

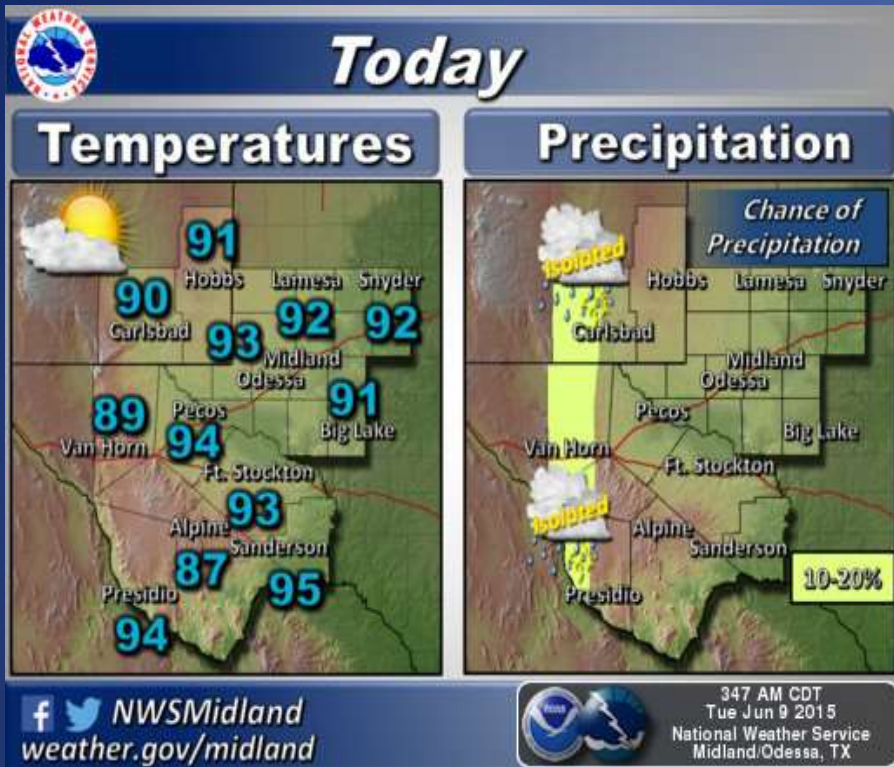

Broad surface high pressure over the Gulf of Mexico will support a mix of sun and clouds today and southeast winds of 10 to 15 mph. Temperatures will remain normal, with highs ranging from the upper 80s and lower 90s near the coast to the upper 90s in the western counties. Isolated sea breeze showers are possible once again today.

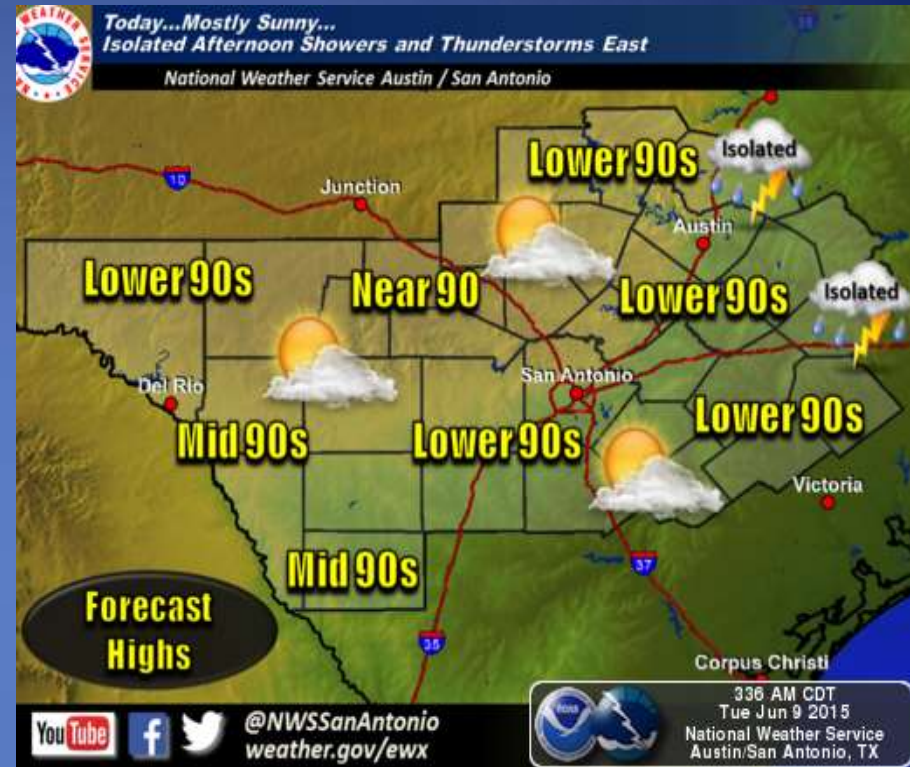

Moisture from the remnants of Hurricane Blanca will continue to help fuel isolated to scattered afternoon and evening thunderstorms. Best chances for rain will be west of the Rio Grande and in area mountains. High temperatures will be near seasonal normal with winds from the southeast at 5 to 15 mph.

# Hazardous Weather

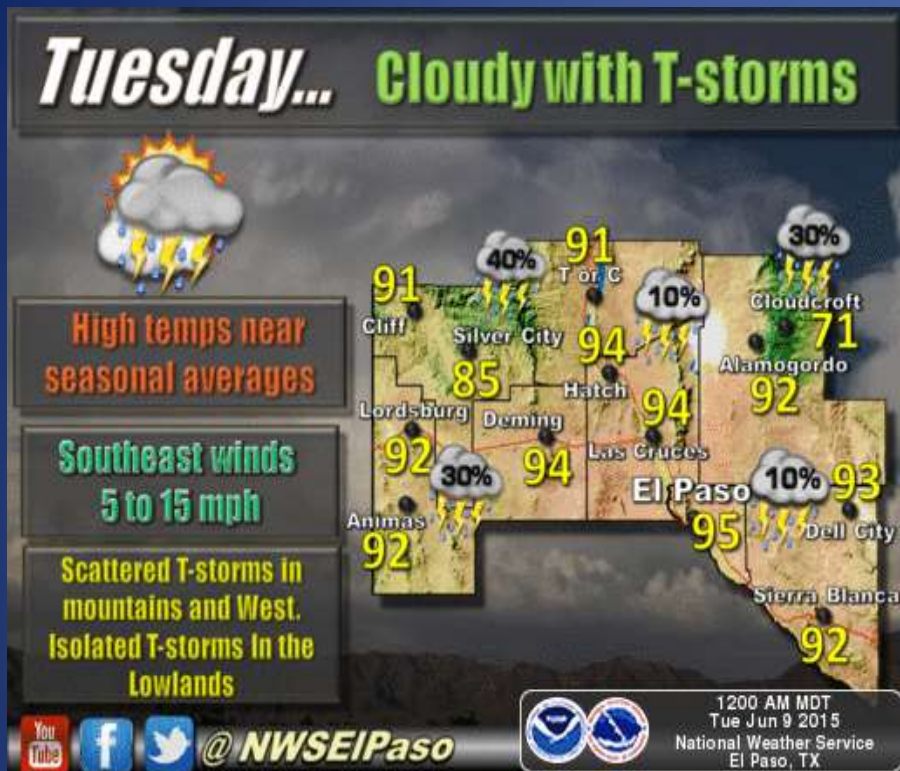

Isolated showers and thunderstorms are expected today across the Guadalupe Mountains and portions of the Davis Mountains and also including the Van Horn Highway 54 Corridor and Presidio Valley. The strongest storms will be capable of producing brief gusty winds, small hail and brief heavy rainfall.

Areas of early morning low clouds will give way to mostly sunny skies. Isolated showers and thunderstorms are possible this afternoon across eastern areas due to a weak surface boundary and upper level disturbance. Near normal temperatures are expected with highs ranging from near 90 in the Hill Country to the mid 90s along the Rio Grande. Winds will be from the south and southeast at 5 to 10 MPH.

# Hazardous Weather

Moisture from the remnants of Hurricane Blanca will continue to help fuel isolated to scattered afternoon and evening thunderstorms. Best chances for rain will be west of the Rio Grande and in area mountains. High temperatures will be near seasonal normal with winds from the southeast at 5 to 15 mph.

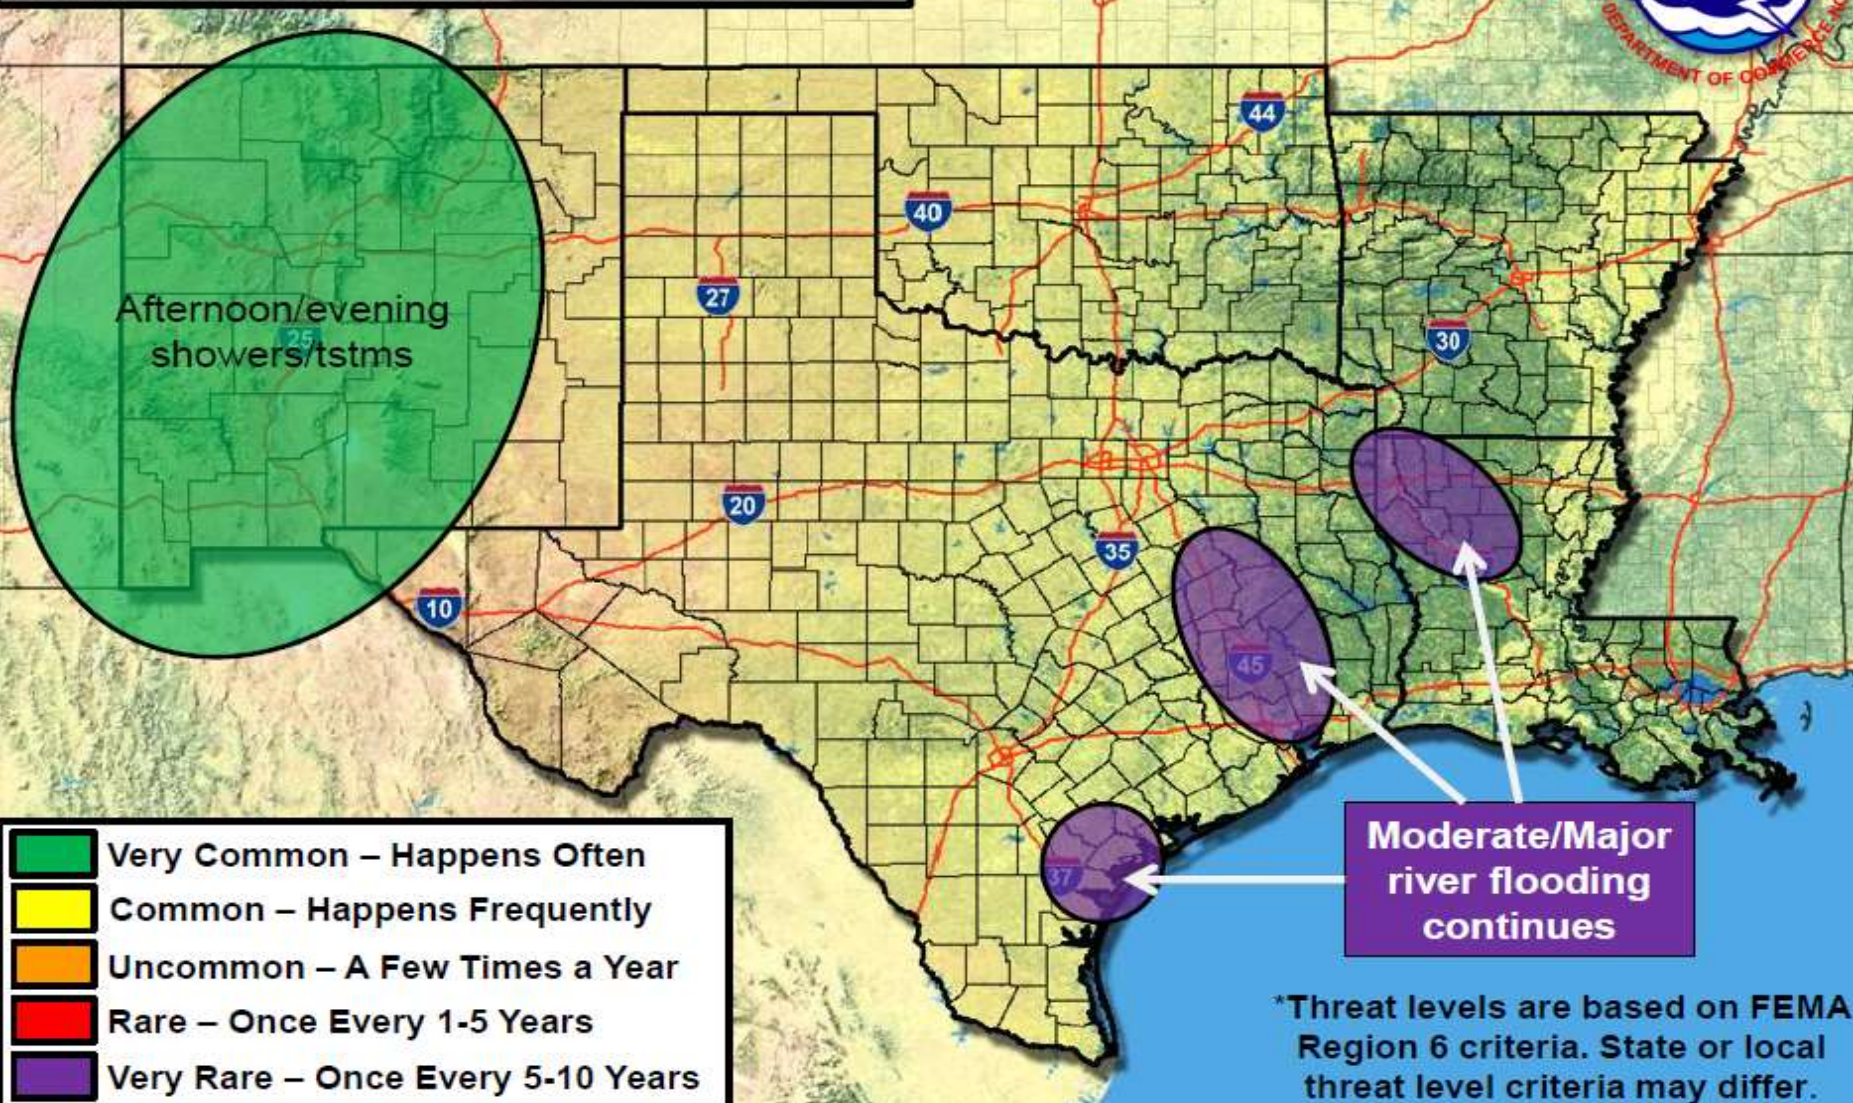

A weak frontal boundary may serve as the focus for isolated thunderstorms developing across the region today. The best chance for storms is expected to be this afternoon, during the peak heating hours of the day. Severe weather is NOT expected at this time, however strong downburst winds and cloud to ground lightning will be possible near any storm.

# Hazardous Weather

## Day 1 Weather Hazards

Valid: 0800 Tue - 0800 Wed

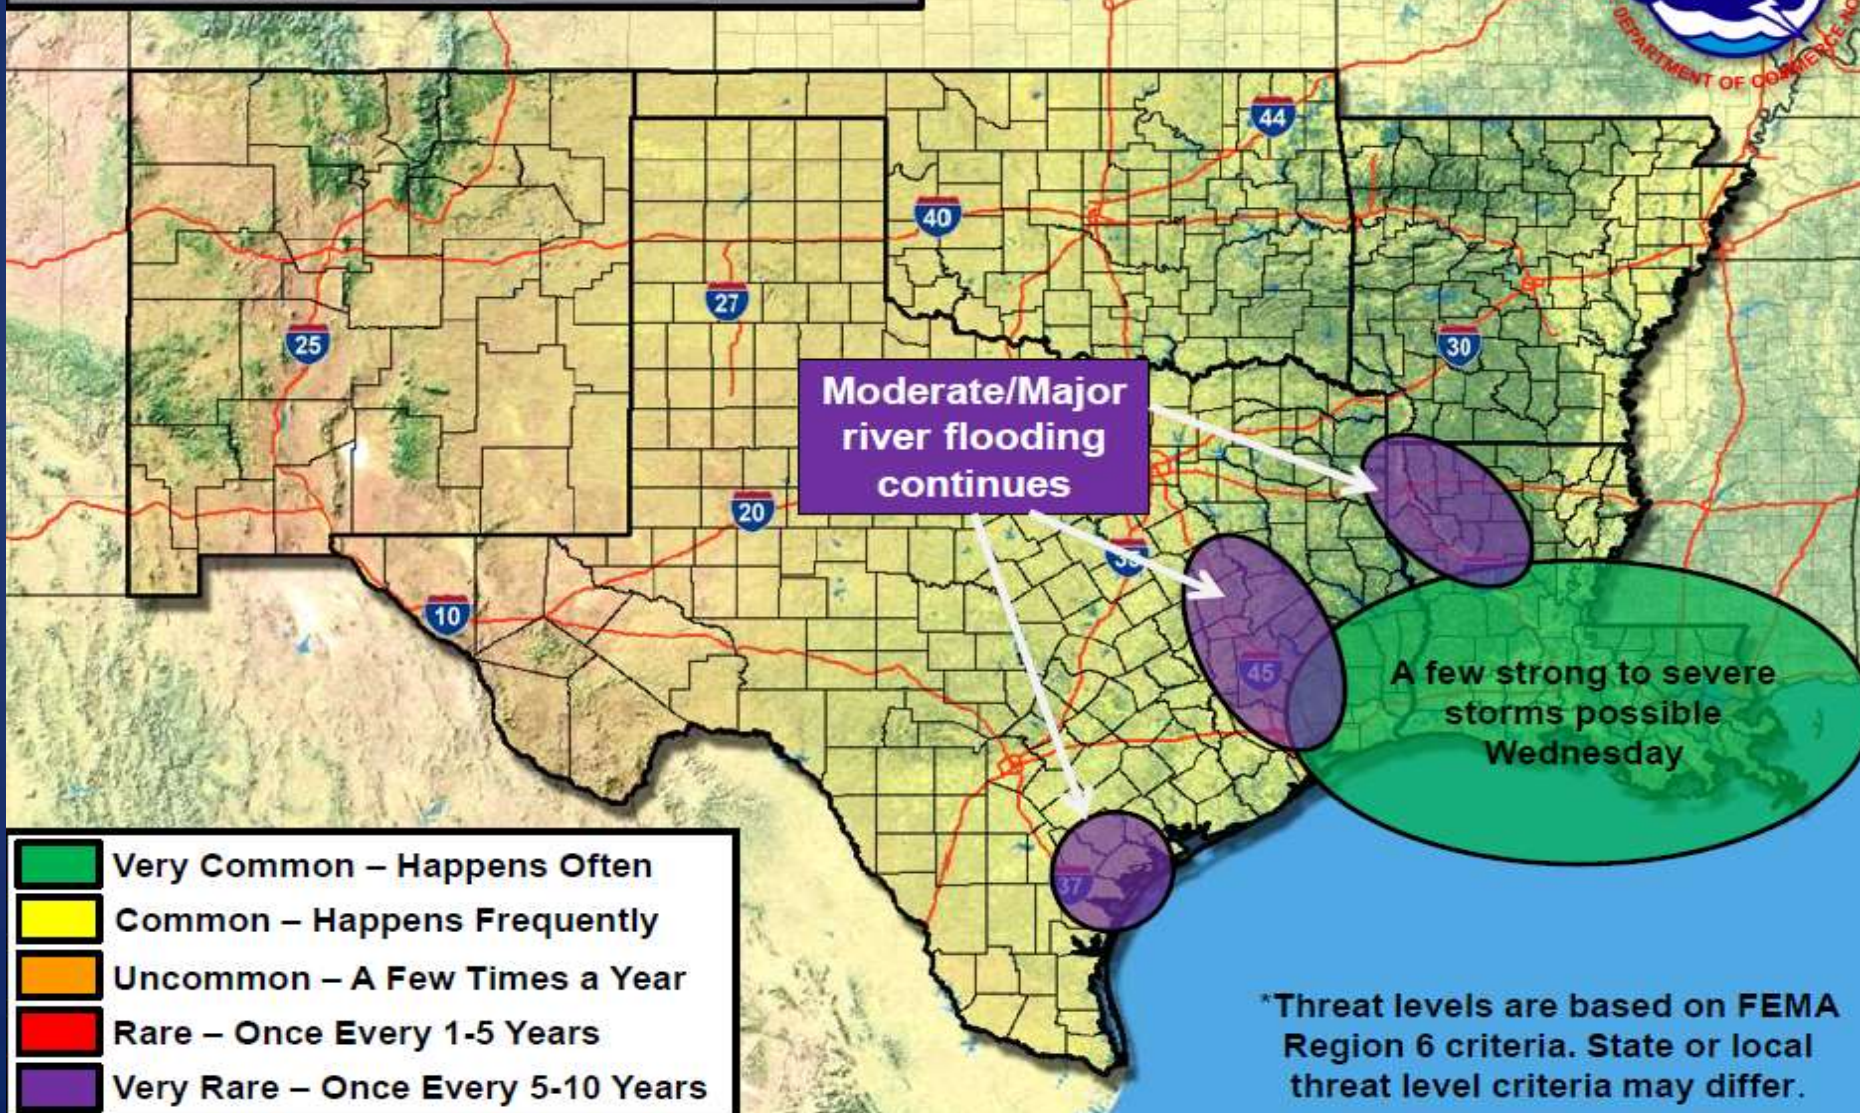

# Hazardous Weather

Day 2-3 Weather Hazards

Valid: 0800 Wed - 0800 Fri

\*Threat levels are based on FEMA Region 6 criteria. State or local threat level criteria may differ.

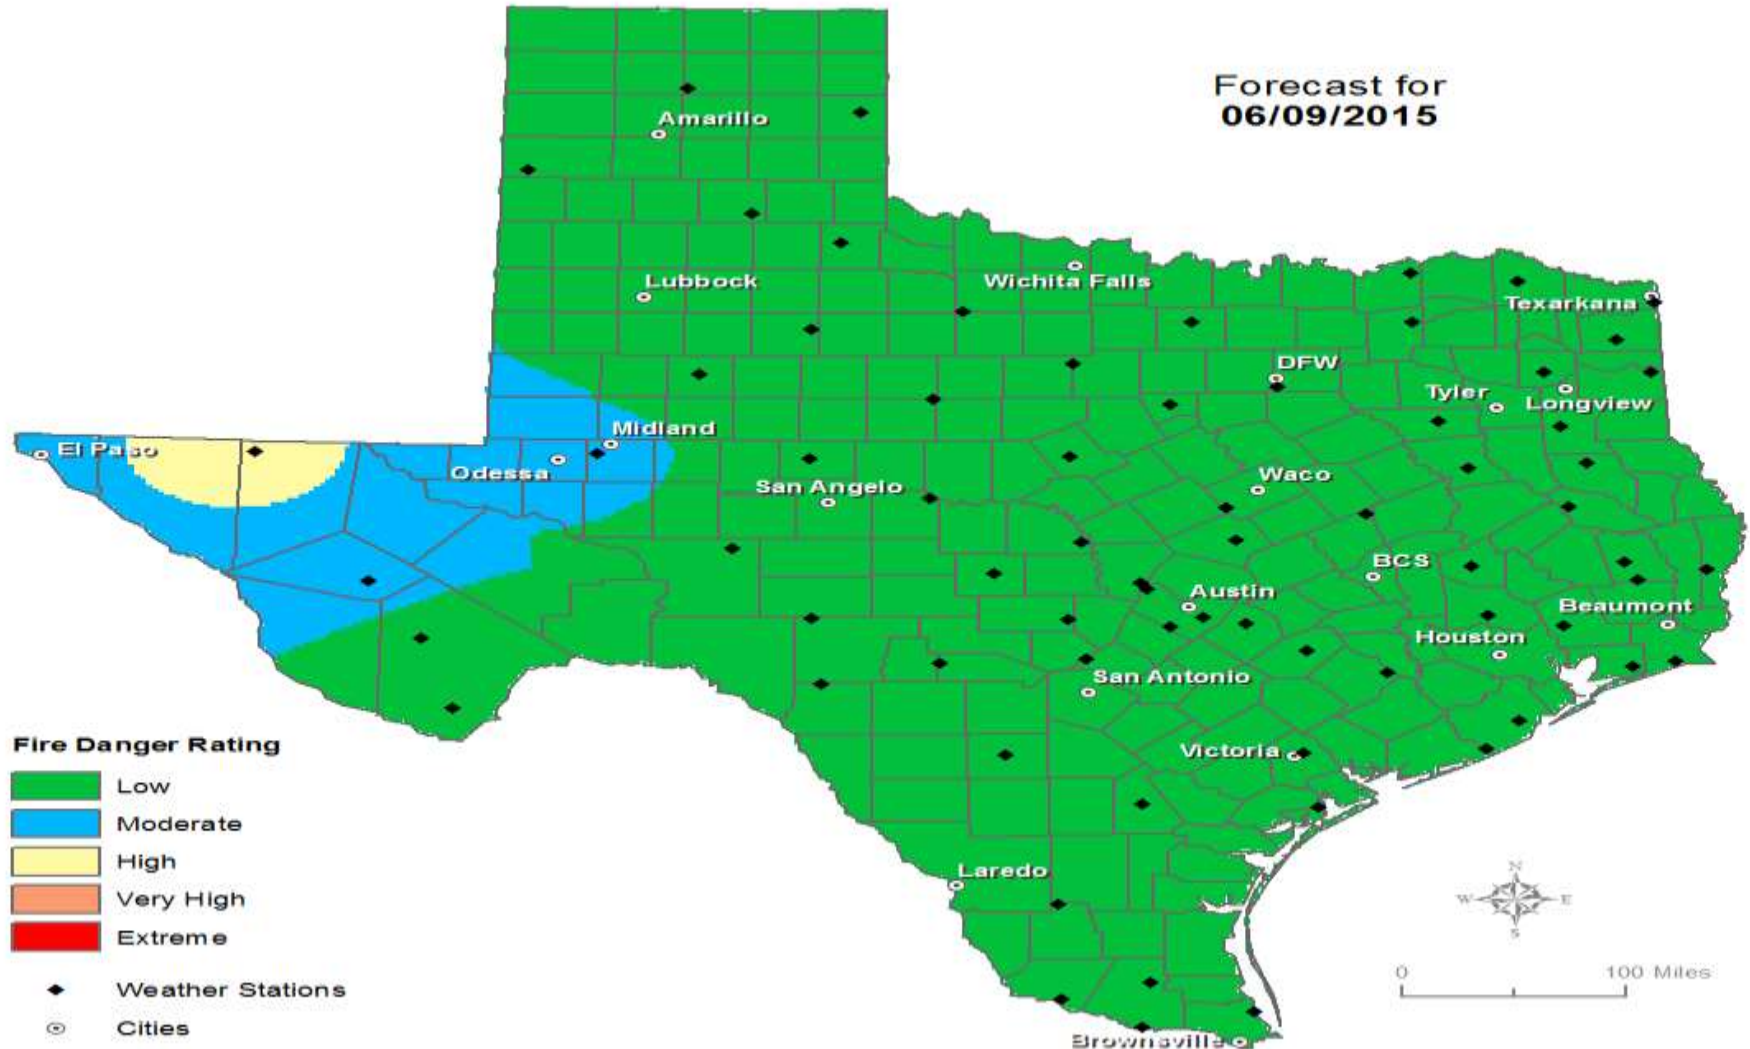

# Weather Warning/ Advisories Issued
